

HOW TO START MEDITATING

BREATH

Don't try to "calm your mind." Instead, appreciate the sensations of your breath in the same way that a wine snob tastes a cabernet. When your mind starts wandering away into thoughts, just recognize that you're thinking. Then return to appreciating the sensations of your breath.

ARMS/HANDS

Relax your shoulders and arms, letting your hands rest on your thighs. Alternately, place one hand on another in your lap.

LEGS/FEET

If you're sitting in a chair, keep your feet flat on the floor and your spine straight. If you're sitting cross-legged on a cushion, the important thing is to have your knees below your hips. If you need a higher seat, make one.

EMOTIONS

Long-term meditators show increased size in brain regions associated with emotional regulation. "Larger volumes in these regions might account for meditators' singular abilities and habits to cultivate positive emotions, retain emotional stability, and engage in mindful behavior," according to a UCLA study.

EYES

Decide what you're going to do with your eyes. If you want the experience to be more body-based, close them. If you want to feel more anchored in the space you're in, keep them open.

TIME

Meditation isn't about length; it's about frequency. In the same way you don't get strong by lifting one giant weight one time, you should try and sit regularly. Five or ten minutes a day is a great start.

Applied Mindfulness Victor G. Carrión, M.D.,John Rettger, Ph.D.,2019-02-11 Applied Mindfulness Approaches in Mental Health for Children and Adolescents starts from the premise that mental health clinicians must have their own mindfulness practice before teaching the tenets and techniques of mindfulness to others including young people To that end the book offers readers clear instructions on how to first practice mindfulness in their own lives and then extend their personal practice outward to others Once this knowledge is internalized the clinician can focus on mindfulness in terms of its application to specific clinical diagnoses such as anxiety and depression attention deficit hyperactivity disorder and substance abuse Because many mental health professionals work in multiple settings such as in schools in clinics and online

the contributors representing a wide range of creative and authoritative voices explain how to skillfully tailor mindfulness interventions for effective application across diverse contexts Drs Carrion and Rettger as Director of the Stanford Early Life Stress and Pediatric Anxiety Program SELSPAP and Director of SELSPAP's Mindfulness Program respectively have been engaged in ongoing community based work delivering mindfulness and yoga programming to underserved youth and their helpers This expertise is evident in their eloquent yet down to earth editing The volume offers clinicians everything they need to begin their mindfulness journey including the following Introductory knowledge on how to get started with a meditation practice Specific mindfulness scripts are provided throughout the book to foster development of the reader's own practice In addition there are audio practices and clear written descriptions of practices to offer support for those learning to meditate internalize mindfulness practices and then adapt these skills for clinical practice A developmental and ecological approach to implementing mindfulness The book offers insight into integrating mindfulness across many settings platforms and applications and includes chapters on mindfulness online at home and in school as well as chapters on incorporating nature into mindfulness practice and the relationship between mindfulness and creativity Material on specific clinical populations including immigrant youth and incarcerated youth A special chapter is devoted to trauma informed yoga which has been shown to be an effective therapeutic intervention for youth who have been incarcerated Comprehensive information on the current state of youth mindfulness research which prepares readers to discuss these topics knowledgeably with colleagues and patients Like ripples in water the benefits of mindfulness spread outward from clinicians to patients families schools and communities Applied Mindfulness Approaches in Mental Health for Children and Adolescents is the first step toward stress reduction peace and compassion for a new generation
