Distrusting Educational Technology Critical Questions For Changing Times:

Distrusting Educational Technology Neil Selwyn, 2013-11-26 *Distrusting Educational Technology* critically explores the optimistic consensus that has arisen around the use of digital technology in education Drawing on a variety of theoretical and empirical perspectives this book shows how apparently neutral forms of educational technology have actually served to align educational provision and practices with neo liberal values thereby eroding the nature of education as a public good and moving it instead toward the individualistic tendencies of twenty first century capitalism Following a wide ranging interrogation of the ideological dimensions of educational technology this book examines in detail specific types of digital technology in use in education today including virtual education open courses digital games and social media It then concludes with specific recommendations for fairer forms of educational technology An ideal read for anyone interested in the fast changing nature of contemporary education *Distrusting Educational Technology* comprises an ambitious and much needed critique
