Transitions to Democracy Kathryn Stoner, Michael McFaul, 2013-04-15 Fifteen case studies by scholars and practitioners demonstrate the synergy between domestic and international influences that can precipitate democratic transitions As demonstrated by current events in Tunisia and Egypt oppressive regimes are rarely immune to their citizens desire for democratic government Of course desire is always tempered by reality therefore how democratic demands are made manifest is a critical source of study for both political scientists and foreign policy makers What issues and consequences surround the fall of a government what type of regime replaces it and to what extent are these efforts successful Kathryn Stoner and Michael McFaul have created an accessible book of fifteen case studies from around the world that will help students understand these complex issues Their model builds upon Guillermo O Donnell Philippe C Schmitter and Laurence Whitehead s classic work *Transitions from Authoritarian Rule* using a rubric of four identifying factors that can be applied to each case study making comparison relatively easy *Transitions to Democracy* yields strong comparisons and insights For instance the study reveals that efforts led by the elite and involving the military are generally unsuccessful whereas mass mobilization civic groups and new media have become significant factors in supporting and sustaining democratic actors This collection of writings by scholars and practitioners is organized into three parts successful transitions incremental transitions and failed transitions Extensive primary research and a rubric that can be applied to burgeoning democracies offer readers valuable tools and information

Culture of the Internet Sara Kiesler,2014-02-04 As we begin a new century the astonishing spread of nationally and internationally accessible computer based communication networks has touched the imagination of people everywhere Suddenly the Internet is in everyday parlance featured in talk shows in special business technology sections of major newspapers and on the covers of national magazines If the Internet is a new world of social behavior it is also a new world for those who study social behavior This volume is a compendium of essays and research reports representing how researchers are thinking about the social processes of electronic communication and its effects in society Taken together the chapters comprise a first gathering of social psychological research on electronic communication and the Internet The authors of these chapters work in different disciplines and have different goals research methods and styles For some the emergence and use of new technologies represent a new perspective on social and behavioral processes of longstanding interest in their disciplines Others want to draw on social science theories to understand technology A third group holds to a more activist program seeking guidance through research to improve social interventions using technology in domains such as education mental health and work productivity Each of these goals has

influenced the research questions methods and inferences of the authors and the look and feel of the chapters in this book. Intended primarily for researchers who seek exposure to diverse approaches to studying the human side of electronic communication and the Internet, this volume has three purposes: to illustrate how scientists are thinking about the social processes and effects of electronic communication; to encourage research-based contributions to current debates on electronic communication design, applications, and policies; and to suggest, by example, how studies of electronic communication can contribute to social science itself.

Global Events: Tipping Points Dr. Philip Gordon, PhD, 2013-02-21

Tipping Points, as evidenced in global events, are in many ways influenced by media. This just-released ground-breaking book, *GLOBAL EVENTS: TIPPING POINTS* by Dr. Philip Gordon, PhD, details three case studies which were selected on the basis of common Tipping Point Attributes. Each involved media contagiousness and stickiness during their development, and each arrived at a dramatic moment in time which could be characterized by the phenomenon of Tipping Points. Recent *GLOBAL EVENTS: TIPPING POINTS* Case Studies: The 2008 Presidential Campaign of Barack Obama was chosen to examine a narrower scope and timeframe for the application of the analysis. The International Financial Crisis of 2007-2010 involves a broader data study period to identify trends and more complex issues. And the Climate Change study is included for consideration as the research and analysis revealed critical relationships between media impact and global events. As the issue of Climate Change is still evolving, Dr. Gordon provides a Global Events Tipping Point Theory methodology for analyzing and predicting our planet's most pressing global issue.

Dr. Philip Gordon, PhD, was awarded his doctorate with high honors from the Centre d'Etudes Diplomatiques et Stratégiques (CEDS) Paris, France, and graduated with his masters while on a full fellowship from Johns Hopkins University, Baltimore, Maryland. He currently lives in Burgundy, France, with his wife and two sons.

Review Comments: The genius of the formulation of *GLOBAL EVENTS: TIPPING POINTS* is that it takes explicit account of the role of social media and the Internet at facilitating bifurcations and promoting dynamical instability. In effect, we have trimmed a few feet of tail off the kite. As a reader, I was informed and educated as to the factors which conspire to influence stability/instability in complex social systems. The book does a good job of making sense of past bifurcations and dynamical instabilities, namely political instability, our perception of global climate change, and international economic crises. My compliments on a truly insightful *Global Events: Tipping Points*.

The application of the tipping point theory to media and global events, particularly *Global Events: Tipping Points*, the financial crisis, and climate change is a fascinating one.

Dr. Serge Besanger, PhD, Expert, International Monetary Fund. Very interesting application of the Tipping Point Theory, potential opportunity for predicting other global events, i.e., Egyptian crisis and perhaps even terrorism activities.
