Fertility Decline in Developing Countries Ellen Jamison,1983 **Fertility Decline in the Less Developed Countries** Nick Eberstadt,1981 **The New Population Problem** Alan Booth,Ann C. Crouter,2005-05-06 This volume focuses on the phenomenon of lower fertility rates occurring in the developed world It explores the factors that influence couples decisions on the number of children they will have and what are the long term consequences of declining ferti

Fertility Decline in Developing Countries, 1960-1997 Samuel Agyei-Mensah,1999-04-30 With the emergence of fertility declines in the greater part of the developing world study of the phenomenon has increased profoundly over the last three decades and a voluminous amount of literature has emerged Yet our knowledge of the decline is scattered in numerous publications making sources difficult to find This bibliography provides a guide to the literature on fertility decline in Latin America Asia and Sub Saharan Africa It will be an invaluable asset for population experts and students wishing to do research on fertility decline Covering the literature from 1960 to 1997 the book draws on extensive sources including books articles in leading population journals research papers and dissertations The opening chapter covers the literature on theories and concepts underlying fertility decline The next three chapters are devoted to the major geographical areas Latin America Asia and Sub Saharan Africa and the final chapter looks at general literature on fertility declines in developing countries **Implications of rapid fertility decline in developing countries** Manoel A. Costa, **Fertility Transition**

in the Developing World John Bongaarts,Dennis Hodgson,2022-09-01 This open access book provides an overview and analysis of the causes and consequences of the massive and highly consequential transition in reproductive behaviour that occurred in Asia Latin America and Africa since the mid 20th century In the 1950s contraceptive use was rare and women typically spend most of their reproductive years bearing and rearing children By 2020 fertility and contraceptive use in Asia and Latin America reached levels commonly observed in the developed world Africa s fertility is still high but transitions have started in all countries This monograph is the first to provide a comprehensive analysis of these trends and their determinants covering changes in reproductive behaviour e g use of contraception and abortion preferences e g desire to limit and space births and the role of socioeconomic development e g education The role of government policies and in particular family planning programs is discussed in depth Particular attention is given to provide a balanced assessment of several political and scientific controversies that have beset the field As such this book provides an interesting read for a wide audience of undergraduate and graduate students researchers and public health policy makers [The Effects of Education, Health, and Social Security on Fertility in Developing Countries](#) Susan Hill Cochrane,1988 **From Death to Birth** National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Population,1998-01-12 The last 35 years or so have witnessed a dramatic shift in the demography of many developing countries Before 1960 there were substantial improvements in life expectancy but

fertility declines were very rare Few people used modern contraceptives and couples had large families Since 1960 however fertility rates have fallen in virtually every major geographic region of the world for almost all political social and economic groups What factors are responsible for the sharp decline in fertility What role do child survival programs or family programs play in fertility declines Casual observation suggests that a decline in infant and child mortality is the most important cause but there is surprisingly little hard evidence for this conclusion The papers in this volume explore the theoretical methodological and empirical dimensions of the fertility mortality relationship It includes several detailed case studies based on contemporary data from developing countries and on historical data from Europe and the United States

Reproductive Change in Developing Countries John G. Cleland, John Hobcraft, Betzy Dinesen, 1985 The World Fertility Survey is probably the largest social survey ever undertaken its operational period 1974 to 1982 coincided with the emergence of new trends in fertility behaviour which are of the utmost importance and the WFS has played a major role in documenting and understanding these trends *Population Change and Economic Development* World Bank, 1985 Derived from the IWorld Development Report 1984 this text focuses on population change and development and shows how policy actions can slow down rapid population growth *Fertility Decline in Developing Countries* Ellen Jamison, 1983 **The Role of Diffusion Processes in Fertility Change in Developing Countries** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1999-03-29 This report summarizes presentations and discussions at the Workshop on the Social Processes Underlying Fertility Change in Developing Countries organized by the Committee on Population of the National Research Council NRC in Washington D C January 29 30 1998 Fourteen papers were presented at the workshop they represented both theoretical and empirical perspectives and shed new light on the role that diffusion processes may play in fertility transition These papers served as the basis for the discussion that is summarized in this report Fertility and Development Ghazi Mumtaz Farooq, Deborah S. DeGraff, 1988 Estudio de las aportaciones teoricas investigaciones empiricas y efectos de las politicas en los determinantes de la fertilidad en los paises en desarrollo dicho analisis debe tener en cuenta La proporcion de mujeres casadas uso de anticonceptivos y aborto y la amplitud de la esterilidad post Parto durante la lactancia Se discute a continuacion las teorias demograficas que circunscriben el control de la natalidad a la esfera privada si bien parece claro que los programas publicos reducen considerablemente la fertilidad al alterar variables socioeconomicas como El trabajo de los menores nivel de educacion femenina y oportunidades de acceso al trabajo y la tasa de mortalidad infantil **Economic Equality and Fertility in Developing Countries** Robert Repetto, 2013-10-18 This book briefly reviews sociological economic and demographic literature pertaining to the relationship between income and fertility in developed and developing countries He presents a conceptual framework to examine how fertility responds to changes in the distribution of household income The analysis of data from Puerto Rico Korea and rural India is carefully executed and conclusive policy

implications are discussed Originally published in 1979 **Population and Development** Ronald G. Ridker, 2013-11-26 First Published in 2011 This book grew out of a project initiated by Resources for the Future to search for selective interventions into the development process that in turn might speed the course of fertility decline in developing countries The result is a volume the authors hope will find wide use not only by researchers and serious students of population problems but also by administrators and policy makers **Population and Development** Geoffrey Hawthorn, 1978 First Published in 1970 Routledge is an imprint of Taylor Francis an informa company **Perspectives on Development and Population Growth in the Third World** O.G. Simmons, 2012-12-06 Until the early to mid 1970s social scientists in the fields of population and development were largely going their own ways Demographers relied almost exclusively on demographic transition theory as their paradigm for understanding the role of development in population change and fertility decline Conversely most development economists and other specialists were certainly aware of the constraints placed upon development objectives by population growth However the main development theories paid little attention to population and the implications of population growth for development Indeed it was not until after the World Population Conference in Bucharest in 1974 that the interaction of population and development became a serious and positive theme for social scientific study Accordingly since about the mid 1970s an extensive literature in the field of population and development has been generated And in 1975 under the auspices of The Population Council the journal Population and Development Review was founded a journal which in the past decade has developed into the premier publication in the world for work in this area But our understanding of development as it refers to change in Third World countries remained fragmented Moreover our understanding of the linkages and interactions between population and development was very limited It is in this regard that Ozzie Simmons's Perspectives on Development and Population Growth in the Third World will certainly have an impact The Value of Family Planning Programs in Developing Countries Rodolfo A. Bulatao, 1998 Family planning programs have been highly successful over the past 30 years in providing women in developing countries with desired access to contraceptive services and helping to reduce fertility rates Notwithstanding this success there is still an urgent need for these programs The world's population is increasing with annual population growth still approximately 80 million people Nearly all of this growth is occurring in developing nations where fertility rates remain relatively high This high fertility runs counter to the preferences expressed by millions of women who actually want to have smaller families Family planning programs are also desirable because they are associated with a range of other benefits most notably improvements in women's and children's health Host countries provide about 60 to 75 percent of funding for family planning However funding and technical assistance from donor nations especially the United States have been crucial to the past success of family planning programs and are equally important for strengthening and expanding program efforts to meet future challenges
