Objective Seed Science and Technology K. Vanangamudi, S. Kavitha, K. Raja, 2017-01-01 This book is based on the ICAR syllabus of Seed Science and Technology It comprises of two major parts 1 Seed Science and Technology and 2 Advances in Seed Science and Technology The part 1 consists of eight units of Seed Science and Technology like seed biology seed production seed processing seed quality control seed storage seed health seed industry development and marketing and protection of plant varieties The part 2 involves the advances in Seed Science and Technology on seed physiology and biochemistry In this the units such as seed development and maturation seed dormancy and germination and seed deterioration are included *Embryology of Flowering Plants: Terminology and Concepts, Vol. 3* T B Batygina, 2019-04-23 Plant embryology dealing with the regularities of initiation and the first stages of development of an organism is now flourishing because of the overall progress being made in natural sciences Such discoveries of the 20th century as production of plants from a single somatic cell experimental haploidy and parasexual hybridization were of general biological

significance The combined efforts of embryologists geneticists and molecular biologists yielded the discovery of specific genes that control meiosis egg cell development and early stages of embryogenesis The tendency to synthesize data of embryology and genetics has become increasingly noticeable It is connected with the fact that the majority of problems connected with morphogenesis such as differentiation specialization the evaluation of features and the definition of the notions gene and feature and genotype and phenotype concern embryology and genetics embryogenetics in one way or another Evolutionary embryology has given rise to a new approach to the study of problems of adaptation in plants In connection with the problem of preserving biological diversity under conditions of ecological stress special attention is paid to ecological embryology revealing the critical periods in early ontogenesis and plasticity and tolerance of reproductive systems at the level of species and population The study of variability of morphogenesis and phenotype in population life cycle variations and the diversity of reproductive systems is the most important point in the population embryology of plants
