Chemical Engineering and Chemical Process Technology - Volume V Ryzhard Pohorecki, John Bridgwater, M. Molzahn. Rafigul Gani and Crispulo Gallegos, 2010-11-30 Chemical Engineering and Chemical Process Technology is a theme component of Encyclopedia of Chemical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias Chemical engineering is a branch of engineering dealing with processes in which materials undergo changes in their physical or chemical state These changes may concern size energy content composition and or other application properties Chemical engineering deals with many processes belonging to chemical industry or related industries petrochemical metallurgical food pharmaceutical fine chemicals coatings and colors renewable raw materials biotechnological etc and finds application in manufacturing of such products as acids alkalis salts fuels fertilizers crop protection agents ceramics glass paper colors dyestuffs plastics cosmetics vitamins and many others It also plays significant role in environmental protection biotechnology nanotechnology energy production and sustainable economical development The Theme on Chemical Engineering and Chemical Process Technology deals in five volumes and covers several topics such as Fundamentals of Chemical Engineering Unit Operations Fluids Unit Operations Solids Chemical Reaction Engineering Process Development Modeling Optimization and Control Process Management The Future of Chemical Engineering Chemical Engineering Education Main Products which are then expanded into multiple subtopics each as a chapter These five volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **Environmental Regulation in the New Global Economy** Rhys Jenkins, Jonathan Barton, 2002-07-29 This book attempts to answer these questions using case studies of three pollution intensive industries iron and steel leather tanning and fertilizers Based on in depth interviews with managers and regulators in Western and Eastern Europe Asia Africa and Latin America the book illustrates the variety of responses to the conflicting pressures of globalization and environmental protection at corporate and industry levels **Enriching the Earth** Vaclav Smil, 2004-02-27 Dr Smil is the world s authority on nitrogenous fertilizer The industrial synthesis of ammonia from nitrogen and hydrogen has been of greater fundamental importance to the modern world than the invention of the airplane nuclear energy space flight or television The expansion of the world's population from 1 6 billion people in 1900 to today's six billion would not have been possible without the synthesis of ammonia In Enriching the Earth Vaclav Smil begins with a discussion of nitrogen's unique status in the biosphere its role in crop production and traditional means of supplying the nutrient He then looks at various attempts to expand natural nitrogen flows through mineral and synthetic fertilizers The core of the book is a detailed narrative of the discovery of ammonia synthesis by Fritz Haber a discovery scientists had sought for over one hundred years and its commercialization by Carl Bosch and the chemical company BASF Smil also examines the emergence

of the large scale nitrogen fertilizer industry and analyzes the extent of global dependence on the Haber Bosch process and its biospheric consequences Finally it looks at the role of nitrogen in civilization and in a sad coda describes the lives of Fritz Haber and Carl Bosch after the discovery of ammonia synthesis Proceedings, 2006 Sustainable Ammonia Production Inamuddin, Rajender Boddula, Abdullah M. Asiri, 2020-01-09 This book presents sustainable synthetic pathways and modern applications of ammonia It focuses on the production of ammonia using various catalytic systems and its use in fuel cells membrane agriculture and renewable energy sectors The book highlights the history investigation and development of sustainable pathways for ammonia production current challenges and state of the art reviews While discussing industrial applications it fills the gap between laboratory research and viable applications in large scale production Soil and Fertilizer Phosphorus Use John Keith Syers, A. E. Johnston, Denis Curtin, Food and Agriculture Organization of the United Nations, 2008 The efficient use of phosphorus P is essential to many agricultural and environmental issues This bulletin reviews analyses and synthesizes information on the efficient use of soil and fertilizer P It presents information on the plant availability of soil and fertilizer P with an emphasis on soil plant interactions The focus is on the changing concepts of the behaviour of both soil and fertilizer P and on the need to define and assess their recovery and thus P use efficiency Soil Degradation and Restoration in Africa Rattan Lal, B. A. Stewart, 2019-07-09 Soil degradation more appropriately is a widespread problem in Africa resulting in decreased agricultural productivity while demand for food continues to increase Degradation is caused by accelerated erosion acidification contamination depletion of soil organic matter and plant nutrients and salinization The major cause of soil degradation in Africa is uncontrolled and excessive grazing in the savanna regions followed by deforestation and the use of inappropriate and extractive farming practices Perpetual neglect of the health of soils in Africa can exacerbate the already serious problems of food and nutritional insecurity and environmental degradation Food and nutritional security of the growing population of Africa can only be achieved if degraded soils are restored and soils of agroecosystems are managed prudently and sustainably Ignoring soils and taking the fragile finite and precious soil resources for granted is the principal cause of poverty hunger and environmental degradation The downward spiral must be reversed through soil restoration measures based on translating science into action This book describes the soils of Africa processes of soil degradation extent and severity of soil degradation and the impacts of degradation processes on food and nutritional security Features Explores the extent and severity of soil degradation in Africa Analyzes the cause effect relationship between anthropogenic activities and soil degradation Reviews processes of soil degradation in Africa including erosion salinization nutrient depletion and decline of soil organic matter Addresses the effect of climate change on soil degradation in Africa Explains how soil degradation causes food and nutritional insecurity Part of the Advances in Soil Sciences series this volume is specifically devoted to the processes and factors that cause soil degradation and the challenges and potential for remediation and restoration of soil health in Africa **Changing Climate and Resource use Efficiency**

in Plants Amitav Bhattacharya, 2018-11-01 Changing Climate and Resource Use Efficiency in Plants reviews the efficiencies for resource use by crop plants under different climatic conditions. This book focuses on the challenges and potential remediation methods for a variety of resource factors Chapters deal with the effects of different climatic conditions on agriculture radiation use efficiency under various climatic conditions the efficiency of water and its impact on harvest production under restricted soil moisture conditions nitrogen and phosphorus use efficiency nitrogen use efficiency in different environmental conditions under the influence of climate change and various aspects of improving phosphorus use efficiency The book provides guidance for researchers engaged in plant science studies particularly Plant Crop Physiology Agronomy Plant Breeding and Molecular Breeding In addition it provides valuable insights for policymakers administrators plant based companies and agribusiness companies Explores climatic effects on agriculture through radiation water nitrogen and phosphorus use efficiency Guides the planning and research of and recommendations for fertilizer application for different crops under various climatic conditions Discusses efficiency improvements for plant and molecular breeders seeking to maximize resource use Collaborative Research Programme for Soil Fertility Restoration and Management in Resource-poor Areas of Sub-Saharan Africa International Fertilizer Development Center, 2002 **Australian Journal of** Soil Research, 2001 Agriculture, Fertilizers, and the Environment Marit Lægreid, Oluf Chr Bøckman, Ola Kaarstad, 1999 The purpose of this book is to provide a balanced scientific review of the environmental and sustainability issues relating to fertilizer use and how its environmental impact can be minimized. The book is suitable for undergraduate and college students taking courses in soil crop and environmental science as well as for agricultural advisers and extension workers and farmers themselves It will also be accessible to a more general audience concerned with food production and the Crop Protection Handbook ,2004 North America Fertilizer Situation ,2001 Proceedings - Fertilizer environment Industry Round Table, Washington, D.C.
