

## Fetal Development

**Conception** - the union of a single egg and sperm, marks the **beginning** of pregnancy - it is not an isolated event

**Ovum and the Sperm Fertilization** - when the sperm penetrates the membrane of egg The fertilized egg undergoes a quick cellular replication and division

**Implantation** - the fertilized egg burrows into the endometrium of the uterine wall (usually 6 to 10 days after conception) Implantation bleeding - light spotting or bleeding at the time of a missed period

**Chorionic villi** - fingerlike projections, extend into the blood-filled spaces of the endometrium; they obtain oxygen and nutrients from the maternal bloodstream and dispose of carbon dioxide and waste products.

Various time spans (10 lunar months, 9 calendar months, 40 weeks, and days) Calculation based on the **first day of the last menstrual period (LMP)** Conception occurring approximately 2 weeks after LMP's

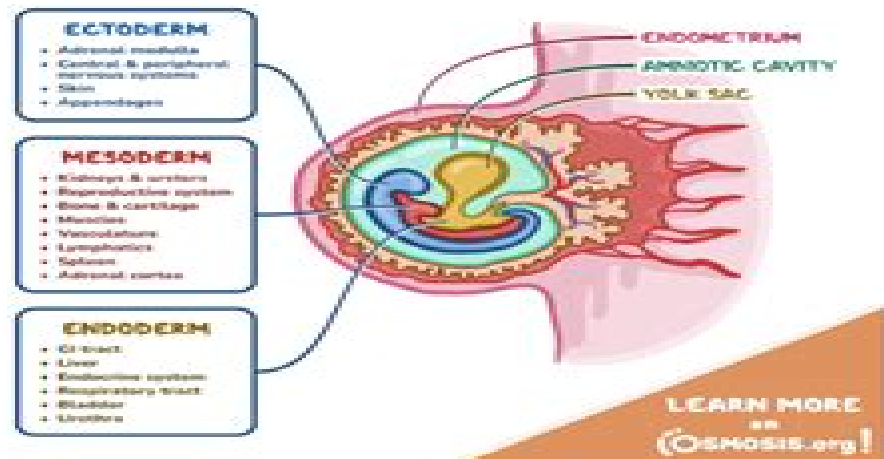

**Ovum or Preembryonic Stage** 1. Conception to day 14 2. Key events: cellular replication, blastocyst formation, embryonic membrane development, primary germ layer establishment. **Embryo Stage** - day 15 until approximately 8-weeks; during this time **organogenesis** is occurring and during this is the time the embryo is vulnerable to teratogens • **Teratogens are substances or exposure that cause abnormal development** • By the end of the **eighth week** all organ systems and external structures are present, and an embryo is unmistakably human **Fetus Stage** - week 9 through to delivery.

**Ectoderm (upper layer)** - epidermis, the glands (anterior pituitary, cutaneous, and mammary), the nails and hair, the central and peripheral nervous systems, the lens of the eye, the tooth enamel, and the floor of the amniotic cavity.

**Mesoderm (middle layer)** - bones and teeth, muscles (skeletal, smoother, and cardiac), the dermis, and connective tissue, the cardiovascular system, and spleen, and the urogenital system.

**Endoderm (lower layer)** - epithelium lining the respiratory tracts and digestive tracts and the glandular cells of associated organs, including the oropharynx, the liver and pancreas, the urethra, the bladder, and the vagina.
