Managing Cyber Attacks in International Law, Business, and Relations Scott J. Shackelford, 2014-07-10 This book presents a novel framework to reconceptualize Internet governance and better manage cyber attacks Specifically it makes an original contribution by examining the potential of polycentric regulation to increase accountability through bottom up action It also provides a synthesis of the current state of cybersecurity research bringing features of the cloak and dagger world of cyber attacks to light and comparing and contrasting the cyber threat to all relevant stakeholders Throughout the book cybersecurity is treated holistically covering outstanding issues in law science economics and politics This interdisciplinary approach is an exemplar of how strategies from different disciplines as well as

the private and public sectors may cross pollinate to enhance cybersecurity Case studies and examples illustrate what is at stake and identify best practices The book discusses technical issues of Internet governance and cybersecurity while presenting the material in an informal straightforward manner The book is designed to inform readers about the interplay of Internet governance and cybersecurity and the potential of polycentric regulation to help foster cyber peace

Scientific Essay from the year 2013 in the subject Communications/Multimedia/Internet/New Technologies. Fort Hays State University course IDS 803 language English abstract. The aim of this paper is to argue that the public-private partnership represents the ultimate solution to protect the national cyber security of the United States against frequent and violent cyber attacks. The paper will elaborate the importance of the cyber security to the national security of the United States, then assesses the present solitary governmental defense measures and highlights the loopholes and defects of the current unilateral administrative strategy that does not involve the private sector, neither in the decision-making process nor

in the execution phase of the defense strategy The paper will also highlight the roles of the White House military and intelligence agencies and subsequently connect them to the proposed public private partnership and how this partnership is going to synergize their roles Consequently this paper is concerned with the cyber defense strategy of the United States For the past three decades the United States has been struggling to formulate that strategy to counter the continuous cyber attacks and threats and to protect the national interest of our country With the constant advance in technology every day it is pretty much debatable whether our defense techniques are enough and deterrent Some may see the recommendations adopted throughout this paper argumentative However we all agree that cyberspace will never be fully secure In the same time there is much that can be done to acquire new strengths increase the ability to adapt and reduce the risk of those threats and attacks
