Quick Start Digital Literacy

Lesley Gourlay, Martin Oliver

Quick Start Digital Literacy:

Student Engagement in the Digital University Lesley Gourlay, Martin Oliver, 2018-02-02 Student Engagement in the Digital University challenges mainstream conceptions and assumptions about students engagement with digital resources in Higher Education While engagement in online learning environments is often reduced to sets of transferable skills or typological categories the authors propose that these experiences must be understood as embodied socially situated and taking place in complex networks of human and nonhuman actors Using empirical data from a JISC funded project on digital literacies this book performs a sociomaterial analysis of student technology interactions complicating the optimistic and utopian narratives surrounding technology and education today and positing far reaching implications for research policy and practice

Digital Universe Peter B. Seel, 2012-01-03 For the student and general reader a tour of the digital universe that offers critical observations and new perspectives on human communication and intelligence Traces the development and diffusion of digital information and communication technologies providing an analysis of trans cultural effects among developed and developing nations Provides a balanced analysis of the pros and cons of the adoption and diffusion of digital technologies Explores privacy censorship the digital divide online games and virtual and augmented realities Follows a thematic structure allowing readers to access the text at any point based on their interests Accompanying resources provide a wealth of related online content Selected by Choice as a 2013 Outstanding Academic Title

Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will
