*Law in an Era of Smart Technology* Susan Brenner, 2007-12-31 Should law be technologically neutral or should it evolve as human relationships with technology become more advanced In *Law in an Era of Smart Technology* Susan Brenner analyzes the complex and evolving interactions between law and technology and provides a thorough and detailed account of the law in technology at the beginning of the 21st century Brenner draws upon recent technological advances evaluating how developing technologies may alter how humans interact with each other and with their environment She analyzes the development of technology as shifting from one of use to one of interaction and argues that this interchange needs us to reconceptualize our approach to legal rules which were originally designed to prevent the misuse of older technologies As technologies continue to develop over the next several decades Brenner argues that the laws directed between human and technological relationships should remain neutral

She explains how older technologies rely on human implementation but new smart technology will be completely automated This will eventually lead to as she explains the ultimate progression in our relationship with technology the fusion of human physiology and technology Law in an Era of Smart Technology provides a detailed historically grounded explanation as to why our traditional relationship with technology is evolving and why a corresponding shift in the law is imminent and necessary

**The Handbook of Fashion Law**, 2025-02-12 Over the past few years fashion law has emerged as a vibrant field of inquiry The legal and policy issues affecting the fashion sector have been investigated with increasing intensity while a growing number of private practice lawyers and in house counsel regard themselves as practising fashion law But what is fashion law And what are the specific legal challenges facing the fashion sector as well as related solutions The Handbook of Fashion Law seeks to answer these questions by bringing together multiple voices approaches and jurisdictions Its contributions are organized into four thematic areas Part I considers the legal infrastructure of the fashion and luxury industries addressing issues related to intellectual property IP as well as the demands of the circular economy protection of cultural heritage and freedom of expression and information Part II maps the IP dimensions of fashion by reviewing the application of design rights copyright trade marks geographical indications plant variety rights and trade secrets Part III analyses specific contractual issues arising in the fashion sector It examines the application of principles and rules found in regulatory frameworks including those governing advertising competition consumer and tax laws Finally Part IV dissects and evaluates the role of new and emerging technologies in the fashion sector from a legal perspective It considers concepts such as e commerce 3D printing counterfeiting artificial intelligence non fungible tokens NFTs the metaverse gaming and wearable technology The Handbook of Fashion Law offers readers a multidisciplinary and multijurisdictional understanding of legal challenges facing the fashion sector Bringing together a diverse range of experts its contributions offer readers an in depth critical and strategic understanding of the fashion industry s legal intricacies Radical Technologies Adam
