

EVINRUDE

Whispering Power

The whisper-quiet operation of your Evinrude Fleetwin will soon prove the good judgment you used in its selection. And after many seasons of breezing along with its sailing smoothness, you . . . and your neighbors . . . will appreciate the benefits of a truly quiet motor.

All the most wanted features in outboard motors, some of which are described on these pages, are engineered into your Fleetwin starter: quiet, smooth operation with sealed carburetor, roller shock absorber mounts and enclosed power plant; quick accessibility for inspection with Evinrude auto-lift hood.

You'll be proud and happy with this motor of your choice, the Evinrude Fleetwin.

THE EVINRUDE EAS-A-MATIC STARTER

*Fast, Effortless
Starting*

With the EAS-A-MATIC starter, your Fleetwin can be started fast and with a minimum of effort. Oval starter pulleys increase cranking leverage at periods of greatest compression and decrease it between compression peaks.

In view on the left pictures the position where the rope pulley when the motor is between compression strokes and the pull required is at a minimum. On the right, the pulley is positioned at a compression stroke where maximum pull is required.

Notice the difference in pulley diameters

in both positions. On the right the motor position requires the greatest pull, and the requirement is offset by the rope pulley being positioned to present the greatest pull with a minimum of effort. You will find this new starter extremely easy to operate and the pull will have a feeling of uniformity.

When the starter rope is pulled, a pawl engages the flywheel and causes the motor to turn. The number of moving parts in the starter are few, yet it is more efficient and easier operating than any starter of previous design.

OWNER'S MANUAL

AIR SILENCER

Air that is breathed into the carburetor is sound filtered, reducing noise of air rushing into the motor to a new degree of quietness. All present day Evinrudes are equipped with these silencers.

MOTOR HOODS

Fore and aft finger tip operated fasteners on the hoods permit the port hood to be raised without the use of tools. This provides easy access to the motor for checking or routine servicing. Bottom motor covers complete the enclosure of the Fleetwin power plant. Rubber moldings seal tightly around the lower edges of the auto-lift hoods and bottom motor covers, minimizing motor noise and protecting the power plant from water.

SHOCK ABSORBER MOTOR MOUNTS

Shock absorber mounts "float" the entire power-plant of the motor, isolating engine vibration from the boat hull, which would produce noise by acting as a sounding board.

SAFTI-GRIP CLUTCH

The Evinrude Safti-Grip propeller clutch does away with shear pin nuisance. Safti-Grip clutch disengages automatically when an obstruction is hit, re-engages automatically when the obstruction is past.

UNDERWATER EXHAUST

Evinrude engineers have developed an underwater exhaust system which eliminates back pressure from the exhaust, thereby improving idling qualities. Exhaust noise is muffled much in the same manner as in the automobile muffler, then expelled underwater.

FOREWORD

Your Evinrude Fleetwin is easy to operate and built to give you the best possible service. Before you attempt to operate the motor, we recommend that you read this manual carefully, especially pages 2 through 7. It is urged that the instructions and recommendations be closely followed.

See inside of back cover for a complete index.
