Evolutionary Psychology William J. Ray, 2012-01-17 Many books in evolutionary psychology emphasize just a small part of the total picture *Evolutionary Psychology* gives students a clear understanding of how current psychological knowledge of human behavior and experience draws from a variety of perspectives It begins with an understanding of evolution and the close connection between organisms and their environment It provides the student the basics necessary to see how the environment and the turning on and off of genes can influence humans and the cultures in which they live The book shows that we solve certain problems of life as many species have done for years It also shows a glimpse of human abilities not seen in other species We use language We purposely teach our children We build large cities that survive long after a single generation We create cultures that through their writings and art can influence other humans thousands of years later Current research in social processes

decision making and brain imaging is presented in a clear manner throughout the book The book emphasizes developmental processes and family relationships sexual and social relationships as well as emotionality and language The book concludes by applying an evolutionary understanding approach to examine the areas of health and disease psychopathology and culture

Handbook of Personology and Psychopathology Stephen Strack, 2005-01-19 Personology is the study of human character in all of its complexities covering the range of normal and pathological individuals from evolutionary development classification diagnosis and measurement to intervention at the individual family and societal levels This volume sure to become a classic in the field provides a state of the art overview of the field of personology including personality theory taxonomy and assessment diagnosis and treatment of personality disorders and the interface between normal and abnormal personlity The breadth and depth of this monumental work and the caliber of its contributors is unsurpassed Many of the leading clinicians and researchers in psychology are contributors including Otto Kernberg John Livesley Robert Bornstein Jeffrey Magnavita Drew Westen Irving Weiner and Lorna Benjamin Represents the culmination of a professional career and a capstone to our publishing program in the area of personality and psychopathology Human Evolutionary Psychology

Louise Barrett, Robin Dunbar, John Lycett, 2002-02-17 Why do people resort to plastic surgery to look young Why are stepchildren at greatest risk of fatal abuse Why do we prefer gossip to algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology What

Makes Us Moral? Neil Levy, 2004-07-27 Is our motivation to be moral determined totally by our genes or are there other factors at work This is the only book to examine the field in its entirety starting with Darwin and moving on to explore how morality could have evolved and what we can learn from the discovery of so called genes for human behaviour In a powerful conclusion Levy argues that while our moral motives are products of evolution so are our immoral ones We are only truly human when we rise above our selfish genes *Information Sur Les Sciences Sociales* International Social Science

Council,2003 **Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur** ,2003 The Psychology of Physical Attraction Viren Swami,Adrian Furnham,2008 The Psychology of Physical Attraction provides a scientific look at physical attraction and offers a better understanding of human beauty *The Human Instinct* Kenneth R. Miller,2018-04-17 From one of America s best known biologists a revolutionary new way of thinking about evolution that shows why in light of our origins humans are still special Edward J Larson Pulitzer Prize winning author of *Evolution* Once we had a special place in the hierarchy of life on Earth a place confirmed by the literature and traditions of every human tribe But then the theory of evolution arrived to shake the tree of human understanding to its roots To many of the most passionate advocates for Darwin s theory we are just one species among multitudes no more significant than any other Even our minds are not our own they tell us but living machines programmed for nothing but survival and reproduction In *The Human Instinct* Brown University biologist Kenneth R Miller confronts both lay and professional misconceptions about evolution Publishers Weekly starred review showing that while evolution explains how our bodies and brains were shaped that heritage does not limit or predetermine human behavior In fact Miller argues in this highly recommended Forbes work that it is only thanks to evolution that we have the power to shape our destiny Equal parts natural science and philosophy *The Human Instinct* makes an absorbing lucid and engaging case that it was evolution that gave us our humanity Ursula Goodenough professor of biology at Washington University in St Louis *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2003 *American Book Publishing Record* ,2002 *Evolution and Human Behavior* John Cartwright,2000 The book covers fundamental issues such as the origins and function of sexual reproduction mating behavior human mate choice patterns of violence in families altruistic behavior the evolution of brain size and the origins of language the modular mind and the relationship between genes and culture
