**Probability and Statistics for Physical Sciences** Brian Martin, Mark Hurwitz, 2023-09-05 Probability and Statistics for Physical Sciences Second Edition is an accessible guide to commonly used concepts and methods in statistical analysis used in the physical sciences This brief yet systematic introduction explains the origin of key techniques providing mathematical background and useful formulas The text does not assume any background in statistics and is appropriate for a wide variety of readers from first year undergraduate students to working scientists across many disciplines Provides a collection of useful formulas with mathematical background Includes worked examples throughout and end of chapter problems for practice Offers a logical progression through topics and methods in statistics and probability Assessment of the National Science Foundation's 2015 Geospace Portfolio Review National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Assessment of the National Science Foundation's 2015 Geospace Portfolio Review, 2017-04-28 At the request of the Advisory Committee for Geosciences of the National Science Foundation NSF a review of the Geospace Section of the NSF Division of Atmospheric and Geospace Sciences was undertaken in 2015 The Portfolio Review Committee was charged with reviewing the portfolio of facilities research programs and activities funded by Geospace Section and to recommend critical capabilities and the balance of investments needed to enable the science program articulated in the 2013 NRC decadal survey Solar and Space Physics A Science for a Technological Society The Portfolio Review Committee's report Investments in Critical Capabilities for Geospace Science 2016 to 2025 ICCGS was accepted by the Advisory Committee for Geosciences in April 2016 Assessment of the National Science Foundation's 2015 Geospace Portfolio Review provides an independent assessment of the ICCGS report This publication assesses how well the ICCGS provides a clear set of findings conclusions and recommendations for Geospace Section that align with the science priorities of the NRC decadal survey and adequately take into account issues such as the current budget outlook and the science needs of the community Additionally this study makes recommendations focused on options and considerations for NSF's implementation of the ICCGS recommendations *The Field Guide to Mixing Social and Biophysical Methods in Environmental Research* Rebecca Lave, Stuart Lane, 2025-02-25 Despite ongoing debates about its origins the Anthropocene a new epoch characterized by significant human impact on the Earth's geology and ecosystems is widely acknowledged Our environment is increasingly a product of interacting biophysical and social forces shaped by climate change colonial legacies gender norms hydrological processes and more Understanding these intricate interactions requires a mixed methods approach that combines qualitative and quantitative biophysical and social research However mixed methods environmental research remains rare hindered by academic boundaries limited training and the challenges of interdisciplinary collaboration Time funding and the integration of diverse data further complicate this research whilst the dynamics and ethics of interdisciplinary teams add another layer of complexity Despite these challenges mixed methods

research offers a more robust and ultimately transformative understanding of environmental questions This Field Guide aims to inspire and equip researchers to undertake such studies Organized like a recipe book it assists researchers in the preparation of their field work as well as offering entry points to key methods and providing examples of successful mixed methods projects This book will be of interest to scholars wishing to tackle environmental research in a more holistic manner spanning sister disciplines such as anthropology statistics political science public health archaeology geography history ecology and Earth science

There is no shortage of articles and books exploring women s underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women s educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of Frontiers in Psychology can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women s underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these article share is their scholarly evidence based approach to understanding a key issue of our time Scientific American ,1928 Monthly magazine devoted to topics of general scientific interest

**Science Abstracts** ,1963      **Corporate Power and Human Rights** Manette Kaisershot,Nicholas Connolly,2018-02-02

There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse
