 2014 Montecatini Terme Italy *Environmental Science* Travis P. Wagner, Robert M. Sanford, 2018-07-04 Historically  
 viewed as a sub discipline of biology or ecology environmental science has quickly grown into its own interdisciplinary field  
 grounded in natural sciences with branches in technology and the social science today s environmental science seeks to  
 understand the human impacts on the Earth and develop solutions that incorporate economic ethical planning and policy  
 thinking This lab manual incorporates the field s broad variety of perspectives and disciplines to provide a comprehensive  
 introduction to the everyday practice of environmental science Hands on laboratory activities incorporate practical  
 techniques analysis and written communication in order to mimic the real world workflow of an environmental scientist This  
 updated edition includes a renewed focus on problem solving and offers more balanced coverage of the field s diverse topics  
 of interest including air pollution urban ecology solid waste energy consumption soil identification water quality assessment  
 and more with a clear emphasis on the scientific method While labs focus on the individual readers are encouraged to  
 extrapolate to assess effects on their campus community state country and the world The effect of Black Economic  
 Empowerment (BEE) on racial inequality in South Africa Korbinian Stinglhamer, 2017-10-11 Seminar paper from the year  
 2016 in the subject Economics Case Scenarios grade 1 0 University of Wisconsin Madison Economics course Economics 477  
 Economic Development of Africa language English abstract This paper investigates the Black Economic Empowerment BEE  
 program in South Africa and its economic justification by analyzing the trends in both intra and interracial inequality since  
 the implementation of BEE Even though inequality is driven by many different factors this paper attempts to analyze whether  
 BEE was able to effectively reduce inequality in the way that it was intended My findings suggest that BEE might have  
 helped to reduce inequality between different races but that it increased inequality among black people During Apartheid  
 black people were excluded from major parts of South Africa s economy This resulted in an unequal income distribution in  
 South Africa Even after Apartheid ended in 1994 income was distributed unequally between races In order to reduce this  
 inequality and equalize opportunities between the different races in South Africa the government implemented an affirmative  
 action program called Black Economic Empowerment BEE in 2003 In this case and in the following sections the word black  
 defines a racial group including Africans coloreds and Indians and can thus be used as synonym for non whites BEE  
 introduced a scorecard which rates companies based on their economic inclusion of black people If the respective company  
 receives a low rating on the scorecard there will likely be a negative effect on their profit compared to a company with a high  
 rating The basic critique of BEE is that its main beneficiary is a small elite Studies about the actual effects of BEE are rare as  
 data on this topic is limited **Drum** ,2009 **Suid-Afrikaanse Hofverslae** ,2014 *Commonwealth Universities
