Proceedings of the 11th International Symposium on Heating, Ventilation and Air Conditioning (ISHVAC 2019) Zhaojun Wang, Yingxin Zhu, Fang Wang, Peng Wang, Chao Shen, Jing Liu, 2020-03-19 This book presents selected papers from the 11th International Symposium on Heating Ventilation and Air Conditioning ISHVAC 2019 with a focus on HVAC techniques for improving indoor environment quality and the energy efficiency of heating and cooling systems Presenting inspiration for implementing more efficient and safer HVAC systems the book is a valuable resource for academic researchers engineers in industry and government regulators A New Hypothesis on the Anisotropic Reynolds Stress Tensor for Turbulent Flows

László Könözy, 2020-12-01 This self contained interdisciplinary book encompasses mathematics physics computer programming analytical solutions and numerical modelling industrial computational fluid dynamics CFD academic benchmark problems and engineering applications in conjunction with the research field of anisotropic turbulence It focuses on theoretical approaches computational examples and numerical simulations to demonstrate the strength of a new hypothesis and anisotropic turbulence modelling approach for academic benchmark problems and industrially relevant engineering applications This book contains MATLAB codes and C programming language based User Defined Function UDF codes which can be compiled in the ANSYS FLUENT environment The computer codes help to understand and use efficiently a new concept which can also be implemented in any other software packages The simulation results are compared to classical analytical solutions and experimental data taken from the literature A particular attention is paid to how to obtain accurate results within a reasonable computational time for wide range of benchmark problems The provided examples and programming techniques help graduate and postgraduate students engineers and researchers to further develop their technical skills and knowledge *Environmental Engineering IV* Artur Pawlowski, Marzenna R. Dudzinska, Lucjan

Pawlowski, 2013-05-21 Environmental engineering has a leading role in the elimination of ecological threats and deals in brief with securing technically the conditions which create a safe environment for mankind to live in Due to its interdisciplinary character it can deal with a wide range of technical and technological problems Since environmental engineering use

Advances in Thermo-Fluid Engineering Achintya Mukhopadhyay, Koushik Ghosh, 2025-01-13 This book presents selected extended papers from the International Conference on Mechanical Engineering INCOM 2024 describing recent advances in thermo fluids engineering research Various topics covered in this book are design and analysis of thermal systems dynamics and control of thermal systems and processes fluid mechanics fluid structure interaction heat transfer internal combustion engines and gas turbines multiphase flow and heat transfer The book is a valuable reference for researchers and professionals working in the fields of mechanical aerospace chemical and power engineering and also for a number of interdisciplinary areas like materials processing electronic and energy storage systems where thermal management is a key design issue Cleaner Treatment Technologies and Productions in The Energy Industry, 2nd edition Jiang Bian, Xuewen

Cao,Chuang Wen,Lin Teng,Zheng Li,2023-04-29 s the rapid development of the world s economy brought serious environmental problems the economy must accelerate industrial structure adjustment and development mode transformation to achieve sustainable development A cleaner production mode based on cleaner technology is a crucial way to solve the conflict between economic growth and environmental protection effectively In essence cleaner production is a kind of production mode in which the environmental strategy of overall prevention is adopted for the production process to reduce or eliminate their possible harm to human beings and the environment while fully meeting human needs and maximizing social and economic benefits Fossil energy and renewable energy have promoted the development of many emerging industries such as the automobile industry aerospace technology modern production and processing and modern transportation industry and preventing waste production while increasing efficiencies in the uses of energy is a crucial issue Specific measures include Using clean energy and raw materials Adopting advanced technology and equipment Comprehensive utilization Reducing pollution from the source Improving utilization efficiency Reducing or avoiding the generation and emission of pollutants in the process of production This Research Topic aims to report the most important and latest technological advances in cleaner treatment technologies of fossil energy such as oil and natural gas and renewable energy such as hydrogen energy and geothermal energy and serves as a platform for addressing and discussing theoretical and practical cleaner production
