Flying to the Moon Michael Collins,1994-04 Astronaut Michael Collins adds a revised chapter to the extraordinary story of his training and participation in the Gemini 10 and Apollo 11 flights Copyright Libri GmbH All rights reserved *Flying to the Moon* Michael Collins,2019-05-28 Based on the adult bestseller Carrying the Fire In time for the 50th anniversary of man's first landing on the moon this re release of Michael Collins's autobiography is a bold sparkling testament to exploration and perseverance In this captivating account space traveler Collins recalls his early days as an Air Force test pilot his training at NASA and his unparalleled experiences in orbit including the Apollo 11 mission the first manned lunar landing The final chapter to this autobiography is an exciting and convincing argument in favor of mankind's continued exploration of our universe Originally published in 1976 and updated for this new edition including an introduction from astronaut Scott Kelly Collins's voice and message are sure to resonate with a new generation of readers **Flying to the Moon: An Astronaut's Story** Michael Collins,2010-01-01 Astronaut Michael Collins adds an introduction and updates the final chapter in this extraordinary account of his training and participation in the Gemini 10 and Apollo 11 space flights **The Man Who Went to the Far Side of the Moon** Bea Uusma Schyffert,2003-07 A biography of the astronaut Michael Collins who circled the moon in the Apollo 11 space capsule while his colleagues Neil Armstrong and Buzz Aldrin landed the lunar module and walked on the moon **Apollo 8** Jeffrey Kluger,2017-05-16 The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968 NASA made a bold decision in just sixteen weeks the United States would launch humankind's first flight to the moon Only the year before three astronauts had burned to death in their spacecraft and since then the Apollo program had suffered one setback after another Meanwhile the Russians were winning the space race the Cold War was getting hotter by the month and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken But when Frank Borman Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission they instantly signed on Written with all the color and verve of the best narrative non fiction Apollo 8 takes us from Mission Control to the astronaut's homes from the test labs to the launch pad The race to prepare an untested rocket for an unprecedented journey paves the way for the hair raising trip to the moon Then on Christmas Eve a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit And when the mission is over after the first view of the far side of the moon the first earth rise and the first re entry through the earth's atmosphere following a flight to deep space the impossible dream of walking on the moon suddenly seems within reach The full story of Apollo 8 has never been told and only Jeffrey Kluger Jim Lovell's co author on their bestselling book about Apollo 13 can do it justice Here is the tale of a mission that was both a calculated risk and a wild crapshoot a stirring account of how three American heroes forever changed our view of the home planet The First Men on the Moon David M. Harland,2007-10-14 On 12 April 1961 Yuri Gagarin became

the first man to orbit the Earth One month later President John F Kennedy challenged the American nation to land a man on the Moon before the decade was out On 16 July 1969 Neil Armstrong Michael Collins and Buzz Aldrin set off in Apollo 11 to attempt this audacious mission and succeeded magnificently This book tells the story of Apollo 11 starting with crew selection and training the choice of the landing site and the assembly of the space vehicle then a detailed account of the mission featuring the lunar landing and moonwalk and a review of how our knowledge of the Moon s history was revolutionised as a result The story is enlivened by dialogue between the astronauts in space and the flight controllers in Mission Control

**Calculated Risk** George Leopold,2016-06-15 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs Killed along with his crew in a launch pad fire on January 27 1967 Grissom also lost his chance to walk on the moon and return to describe his journey Others went in his place The stories of the moon walkers are familiar Less appreciated are Grissom s contributions The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive and corrective account of Grissom s life that places his career in the context of the Cold War and the history of human spaceflight

**Calculated Risk The Supersonic Life and Times of Gus Grissom** adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history

**The Astronaut Who Painted the Moon: The True Story of Alan Bean** Dean Robbins,2019-05-28 Journey to the moon on the Apollo 12 mission with Alan Bean the fourth astronaut to walk on the lunar surface and the only artist to paint its beauty firsthand As a boy Alan wanted to fly planes As a young navy pilot Alan wished he could paint the view from the cockpit So he took an art class to learn patterns and forms But no class could prepare him for the beauty of the lunar surface some 240 000 miles from Earth In 1969 Alan became the fourth man and first artist on the moon He took dozens of pictures but none compared to what he saw through his artistic eyes When he returned to Earth he began to paint what he saw Alan s paintings allowed humanity to experience what it truly felt like to walk on the moon

Journalist and storyteller Dean Robbins s tale of this extraordinary astronaut is masterful and artist Sean Rubin s illustrations are whimsical and unexpected With back matter that includes photos of the NASA mission images of Alan s paintings and a timeline of lunar space travel this is one adventure readers won t want to miss

**To the Moon!** Jeffrey Kluger,Ruby Shamir,2019-05-07 The exciting and inspiring true story of Apollo 8 the first crewed spaceship to break free of the Earth s orbit and reach the moon by the best selling author of Apollo 13 What s more exciting than spaceships and astronauts How about a spaceship carrying the first astronauts ever to see the moon firsthand on Christmas The year was 1968 and the American people were still reeling from the spacecraft fire that killed the Apollo 1 crew a year earlier On top of that there

were rumors that the Russian cosmonauts were getting ready to fly around the moon NASA realized that they needed to take a bold step and that they needed to take it now They wanted to win the space race against Russia and hold true to President Kennedy's promise to put a man on the moon by the end of the decade So in a risky move a few days before Christmas of that year they sent Frank Borman Jim Lovell and Bill Anders to the moon This book about the exciting and inspiring true story of Apollo 8 the first crewed spaceship to break free of Earth's orbit and reach the moon tells the story of these three brave men the frantic rush to get their rocket ready and the journey that gave the American people and the world a new look at the planet we live on and the corner of space we inhabit Filled with the science and training required to put a person into space and every detail of what it's like to live in a spaceship for days on end including what happens when astronauts need to use the bathroom this book is sure to leave kids clamoring for a spot on the next mission to outer space *Neil Armstrong* Jay Barbree, 2014-07-08 To date everything written about Armstrong's life and flights has been written from the outside looking in Barbree is the only person whom Neil Armstrong trusted to share close personal details about his inspiring life story Working from his years of notes and with the full cooperation of the Armstrong family Barbree has written the definitive biography of America's most famous astronaut and one of our greatest modern heroes Much has already been written about Armstrong and the major players who helped him fly to the moon but he wanted this book to emphasize his two passions family and flight Barbree and Armstrong discussed everything from his two marriages and the death of his baby daughter to his love of flying the war years and of course his time in space The book timed to coincide with the 45th anniversary of the Apollo 11 launch and full of never before seen photos includes many personal details that have never before been written such as what Armstrong really felt when he took that first step on the moon what life in NASA was like his relationships with the other astronauts and what he felt the future of space exploration should be **One Giant Leap** Charles Fishman, 2019-06-11 The remarkable story of the trailblazers and the ordinary Americans on the front lines of the epic mission to reach the moon President John F Kennedy astonished the world on May 25 1961 when he announced to Congress that the United States should land a man on the Moon by 1970 No group was more surprised than the scientists and engineers at NASA who suddenly had less than a decade to invent space travel When Kennedy announced that goal no one knew how to navigate to the Moon No one knew how to build a rocket big enough to reach the Moon or how to build a computer small enough and powerful enough to fly a spaceship there No one knew what the surface of the Moon was like or what astronauts could eat as they flew there On the day of Kennedy's historic speech America had a total of fifteen minutes of spaceflight experience with just five of those minutes outside the atmosphere Russian dogs had more time in space than U S astronauts Over the next decade more than 400 000 scientists engineers and factory workers would send 24 astronauts to the Moon Each hour of space flight would require one million hours of work back on Earth to get America to the Moon on July 20 1969 More than fifty years later One Giant Leap is the sweeping definitive behind the scenes account of the furious

race to complete one of mankind's greatest achievements. It's a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today. Charles Fishman introduces readers to the men and women who had to solve 10 000 problems before astronauts could reach the Moon. From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the factories where dozens of women sewed spacesuits, parachutes and even computer hardware by hand, Fishman captures the exceptional feats of these ordinary Americans. One Giant Leap is the captivating story of men and women charged with changing the world as we knew it: their leaders, their triumphs, their near disasters, all of which led to arguably the greatest success story and the greatest adventure story of the twentieth century. **A**

**Bibliography of Aerospace Books and Teaching Aids for Secondary School Students and Teachers** National Aerospace Education Council (U.S.), 1961 **Moon Shot** Alan Shepard, Deke Slayton, Jay Barbree, 2011-05-03 New York Times bestseller for fans of *First Man*. A breathtaking insider history of NASA's space program from astronauts Alan Shepard and Deke Slayton. Entertainment Weekly: On October 4, 1957, the Soviet Union launched Sputnik I and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation's most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA's effort to conquer space, and *Moon Shot* is their inside account of what many call the twentieth century's greatest feat: landing humans on another world. Collaborating with NBC's veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America's space exploration from the time of Shepard's first flight until he and eleven others had walked on the moon.

**How Apollo Flew to the Moon** W. David Woods, 2008-02-13 Between 1968 and 1972, twenty-four daring men journeyed from Earth to the Moon. This fascinating book traces what was a massive accomplishment, right from the early launches through manned orbital spaceflights, detailing each step. Out of the battlefields of World War II came the gifted German engineers and designers who developed the V-2 rocket, which evolved into the powerful Saturn V booster that propelled men to the Moon. David Woods tells this exciting story, starting from America's postwar astronautical research facilities. The techniques and procedures developed have been recognised as an example of human exploration at its greatest, demonstrating a peak of technological excellence. **Magnificent Desolation** Buzz Aldrin, Ken Abraham, 2010. Recounts the astronaut's life and career, including his childhood, the landmark 1969 moon landing, and his battles with alcoholism and depression after his fame. *NASA EP*. United States: National Aeronautics and Space Administration, 1961 **Gender and the Race for Space** Erinn McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American anti-communist masculinity, which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level. This

American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband Allowing women to fly into space would have represented a lack of individual control with spaceflight technology      *School Library Journal* ,2009      **Aerospace Bibliography** National Aerospace Education Council (U.S.),1966      **The Elementary School Library Collection, Phases 1-2-3** ,1986
