Entity-Oriented Search Krisztian Balog,2018-10-02 This open access book covers all facets of entity oriented search where search can be interpreted in the broadest sense of information access from a unified point of view and provides a coherent and comprehensive overview of the state of the art It represents the first synthesis of research in this broad and rapidly developing area Selected topics are discussed in depth the goal being to establish fundamental techniques and methods as a basis for future research and development Additional topics are treated at a survey level only containing numerous pointers to the relevant literature A roadmap for future research based on open issues and challenges identified along the way rounds out the book The book is divided into three main parts sandwiched between introductory and concluding chapters The first two chapters introduce readers to the basic concepts provide an overview of entity oriented search tasks and present the various types and sources of data that will be used throughout the book Part I deals with the core task of entity ranking given a textual query possibly enriched with additional elements or structural hints return a ranked list of entities This core task is examined in a number of different variants using both structured and unstructured data collections and numerous query formulations In turn Part II is devoted to the role of entities in bridging unstructured and structured data Part III explores how entities can enable search engines to understand the concepts meaning and intent behind the query that the user enters into the search box and how they can provide rich and focused responses as opposed to merely a list of documents a process known as semantic search The final chapter concludes the book by discussing the limitations of current approaches and suggesting directions for future research Researchers and graduate students are the primary target audience of this book A general background in information retrieval is sufficient to follow the material including an understanding of basic probability and statistics concepts as well as a basic knowledge of machine learning concepts and supervised learning algorithms **Document Analysis And Text Recognition: Benchmarking State-of-the-art Systems** Volker Margner,Umapada Pal,Apostolos Antonacopoulos,2018-02-27 The compendium presents the latest results of the most prominent competitions held in the field of Document Analysis and Text Recognition It includes a description of the participating systems and the underlying methods on one hand and the datasets used together with evaluation metrics on the other hand This volume also demonstrates with examples how to organize a competition and how to make it successful It will be an indispensable handbook to the document image analysis community *Focused Retrieval and Evaluation* Shlomo Geva,Jaap Kamps,Andrew Trotman,2010-07-15 This book constitutes the thoroughly refereed post workshop proceedings of the 8th International Workshop of the Initiative for the Evaluation of XML Retrieval INEX 2009 held in Brisbane Australia in December 2009 The aim of the INEX 2009 workshop was to bring together researchers in the field of XML IR who participated in the INEX 2009 campaign During the past year participating organizations contributed to the building of large scale XML test collections by creating topics performing retrieval runs and providing relevance assessments

The workshop concluded the results of this effort summarized and addressed issues encountered and devised a work plan for the future evaluation of XML retrieval systems The 42 full papers presented together with 3 invited papers were carefully reviewed and selected from 49 submissions They have been divided into sections according to the eight tracks of the workshop investigating various aspects of XML retrieval from book search to entity **XML Data Mining: Models, Methods, and Applications** Tagarelli, Andrea,2011-11-30 The widespread use of XML in business and scientific databases has prompted the development of methodologies techniques and systems for effectively managing and analyzing XML data This has increasingly attracted the attention of different research communities including database information retrieval pattern recognition and machine learning from which several proposals have been offered to address problems in XML data management and knowledge discovery XML Data Mining Models Methods and Applications aims to collect knowledge from experts of database information retrieval machine learning and knowledge management communities in developing models methods and systems for XML data mining This book addresses key issues and challenges in XML data mining offering insights into the various existing solutions and best practices for modeling processing analyzing XML data and for evaluating performance of XML data mining algorithms and systems **Research and Advanced Technology for Digital Libraries** Mounia Lalmas,Joemon Jose,Andreas Rauber,Roberto Sebastiani,Ingo Frommholz,2010-08-30 This book constitutes the proceedings of the 14th European Conference on Research and Advanced Technology for Digital Libraries ECDL 2010 held in Glasgow UK in September 2010 The 22 long papers 14 short papers 19 posters and 9 demos presented in this volume were carefully reviewed and selected from 102 full paper submissions 40 poster submissions and 13 demo submissions In addition the book contains the abstract of a keynote speech and an appendix stating information on the doctoral consortium the workshops and tutorials as well as the panel which were held at the conference The papers are grouped in topical sections on system architectures metadata multimedia IR interaction and interoperability digital preservation social Web Web 2 0 search in digital libraries meta analysis of digital libraries query log analysis cooperative work in DLs ontologies and domain specific DLs posters and demos Experimental IR Meets Multilinguality, Multimodality, and Interaction Lorraine Goeuriot,Philippe Mulhem,Georges Quénot,Didier Schwab,Giorgio Maria Di Nunzio,Laure Soulier,Petra Galuščáková,Alba García Seco de Herrera,Guglielmo Faggioli,Nicola Ferro,2024-09-13 The two volume set LNCS 14958 14959 constitutes the proceedings of the 15th International Conference of the CLEF Association CLEF 2024 held in Grenoble France during September 9 12 2024 The proceedings contain 11 conference papers 6 best of CLEF 2023 Labs papers and 14 Lab overview papers accepted from 45 submissions In addition an overview paper on the CLEF activities in the last 25 years is included The CLEF conference and labs of the evaluation forum deal with topics in information access from different perspectives in any modality and language focusing on experimental information retrieval IR **Experimental IR Meets Multilinguality, Multimodality, and Interaction** Fabio Crestani,Martin Braschler,Jacques Savoy,Andreas Rauber,Henning Müller,David E. introduced to the background and fundamentals of the ETS Afterward state of the art evaluation methods that require or do not require human references are described Based on how linear optimization has improved other natural language processing tasks we developed a new methodology based on genetic algorithms that optimize content metrics linearly Under this optimization we propose SECO SEVA as an automatic evaluation metric available for research purposes Finally the text finishes with a consideration of directions in which automatic evaluation could be improved in the future The information provided in this book is self contained Therefore the reader does not require an exhaustive background in this area Moreover we consider this book the first one that deals with the ETS in depth **Evaluation of Public Services and Public Services Personnel** ,1956 *Advances in Focused Retrieval* Jaap Kamps,Andrew Trotman,2009-09-03 This book constitutes the thoroughly refereed proceedings of the 7th International Workshop of the Initiative for the Evaluation of XML Retrieval INEX 2008 held at Dagstuhl Castle Germany in December 2008 The aim of the INEX 2008 workshop was to bring together researchers who participated in the INEX 2008 campaign Over the year leading up to the event participating organizations contributed to the building of a large scale XML test collection by creating topics performing retrieval runs and providing relevance assessments The workshop concluded the results of this large scale effort summarized and addressed the issues encountered and devised a work plan for the future evaluation of XML retrieval systems The 49 papers included in this volume report the final results of INEX 2008 They have been divided into sections according to the seven tracks of the workshop investigating various aspects of XML retrieval from book search to entity ranking including interaction aspects **Digital Libraries** Tatjana Aparac,1999 IEEE International Symposium on Object-Oriented Real-Time Distributed Computing (ISORC) ,2000 *Evaluation of Public Services and Public Services Personnel* University of Illinois at Urbana-Champaign.
