Images of the Anthropocene in Speculative Fiction Tereza Dedinová, Weronika Laszkiewicz, Sylwia Borowska-Szerszun, 2021-03-01 In order to demonstrate that speculative fiction provides a valuable contribution to the discussion about the challenges of the Anthropocene *Images of the Anthropocene in Speculative Fiction* investigates a range of novels whose subject matter pertains to various aspects of the Anthropocene These include the destruction and protection of the natural environment the relationship between human and non human inhabitants of the planet the role of myth in the shaping of and combat against the Anthropocene the political dimensions of the Anthropocene the ensuing threat of the Apocalypse and the role of post apocalyptic narratives To explore these topics our authors examine the works of Patricia Briggs M R Carey Dmitry Glukhovsky Ursula K Le Guin N K Jemisin Stephenie Meyer China Mi ville James Patterson Maggie Stiefvater J R R Tolkien and Scott Westfield Their essays demonstrate that speculative fiction given its ability to pursue scenarios of alternative history and present familiar things in an unfamiliar way can alter the readers perception of their duties and responsibilities towards their communities and the world so that the threat of human wrought destruction might ultimately be averted

Urban Tunnels Role explores the hidden world of underground infrastructure and its vital role in modern cities. This book highlights how urban tunnels support essential utilities like water and electricity and transportation systems such as subways, impacting urban development, resilience, and sustainability. Intriguingly, underground infrastructure has evolved alongside urban development, initially serving basic sanitation needs and expanding to meet current challenges like population density and climate change. The book emphasizes the importance of tunnels for efficient utility distribution and transportation networks. It examines geological considerations, excavation techniques, and structural engineering principles, providing a comprehensive understanding of tunnel construction. By understanding these subterranean networks, cities can optimize resource allocation and minimize environmental impact. Beginning with the historical development of urban tunneling, the book progresses through utility and transportation aspects, featuring global case studies of successful tunnel implementation. It concludes by exploring future trends like smart tunnels, showcasing how advanced monitoring systems contribute to smart city initiatives. This approach ensures readers gain a holistic view of urban tunneling's role in shaping sustainable and resilient urban centers. *The Urban Question in Africa* Padraig R. Carmody, James T. Murphy, Richard Grant, Francis Y. Owusu, 2023-09-28

*illuminates the path to more generative urban transitions in Africa's cities and developing rural areas. Africa is the world's most rapidly urbanizing region. The predominantly rural continent is currently undergoing an urban revolution, unlike any other, generally taking place without industrialization and often characterized by polarization, poverty, and fragmentation. While many cities have experienced construction booms and real estate speculation, others are marked by expanding informal economies and imploding infrastructures. *The Urban Question in Africa: Uneven Geographies of Transition* examines the imbalanced and contested nature of the ongoing urban transition of Africa. Edited and authored by leading experts on the subject, this unique volume develops an original theory conceptualizing cities as sociotechnical systems constituted by production, consumption, and infrastructure regimes. Throughout the book, in-depth chapters address the impacts of current meta-trends: global geopolitical shifts, economic changes, the climate crisis, and others on Africa's cities and the broader development of the continent. Presents a novel framework based on extensive fieldwork in multiple countries and regions of the continent. Examines geopolitical and socioeconomic topics such as manufacturing in African cities, the green economy in Africa, and the impact of China on urban Africa. Discusses the prospects for generative urbanism to produce and sustain long-term development in Africa. Features high-quality maps, illustrations, and photographs. *The Urban Question in Africa: Uneven Geographies of Transition* is essential reading for undergraduate and postgraduate students in geography, urban planning, and African studies; academic researchers; geographers; urban planners; and policymakers. *The Urban**

Caribbean in an Era of Global Change Robert B. Potter, 2000 Based on the author's first hand field research this book addresses the twin processes of urbanization and globalization as they affect the contemporary Caribbean region One of the key aims of the book is to focus attention on the fact that contrary to popular perceptions the Caribbean is highly urbanized Indeed statistics show that the region is more highly urbanized than the world taken as a whole In addition the fact that the Caribbean region has always been affected by processes of globalization in respect of its economy polity and society is central to the text The chapters cover pressing topics such as urban change and the evolution of mini metropolitan regions the importance of the mercantile and plantopolis frameworks tourism post modernity and the urban nexus economic change and the dual processes of global convergence and divergence and the nature of the relationships existing between the state the informal sector housing and environmental conditions In reality it is shown that the development of tourism and enclave manufacturing is leading to new forms of urban concentration and not spatial dispersal City Limits Keith
