Cooperation Networks and Economic Development Andrés Cárdenas O'Farrill, 2021-02-11 For most Western audiences Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo anything but a hub of industrial innovation and high value added biotechnology However a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country's economic history The book takes an interdisciplinary approach exploring issues such as interdependency purpose and history as natural constituencies of the innovation process It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises This book will be of interest to academic researchers in the fields of innovation and economic development

Transition Economies in Central and Eastern Europe Alicja Sielska, 2023-08-16 The theory of interventionism of the Austrian School of Economics explains the successes and failures of the transformation processes in Central and Eastern European countries and offers a deep insight into contemporary economic phenomena Three decades have passed since the collapse of communism that precipitated the economic transformation of these countries This book describes the Austrian view of socialism and in such a context explains the transformational success of the countries of Central and Eastern Europe Moreover it shows that the theory of interventionism has not lost its relevance and the theory itself along with its modifications may be used to explain current economic events The book is divided into four sections The first part presents the Austrian perspective on socialism the second discusses a new approach to the Austrian theory of interventionism suggesting that the theory should be revised and that its scope should be extended beyond the transformation of the 1990s into the realm of contemporary economic reality the third part is oriented towards pragmatic considerations whereby the authors employ the Austrian perspective to analyze specific factors that according to their view had an impact on the

transformational success of post communist countries while the final part is ideological and philosophical in character Here the authors search for certain principia that govern broadly understood social and economic transformations The book is addressed to those interested in the Austrian School of Economics and the political transformation of the 1990s as well as those who wish to understand contemporary economic trends
