## **Global Intelligence And Human Development Toward An Ecology Of Global Learning:**

Global Intelligence and Human Development Mihai Spariosu, 2004 Proposes an innovative approach to globalization based on an ethics of global awareness      **Toward a Global Psychology** Michael J. Stevens, Uwe Peter Gielen, 2007 Toward a Global Psychology defines the emerging field of international psychology It provides an overview of the conceptual models research methodologies interventions and pedagogical approaches that are most appropriate to transnational settings In so doing the book provides readers with a rich appreciation of how to approach a global psychology as researchers practitioners and students The book's thorough review of the existing literature on international psychology from around the world provides the knowledge needed to successfully engage in the science and practice of psychology in an increasingly globalized society Arranged into four parts the book discusses topics including the specialty of international psychology global perspectives on the history of psychology current trends in psychology worldwide problems and issues confronting psychologists in non Western and developing regions and the movement toward indigenizing psychology guidelines for those involved in scientific and professional psychology around the world descriptions of therapeutic and macro level interventions conducted in non Western settings and predictions about the future of international psychology Case examples are integrated throughout to further highlight key concerns and challenges faced by global psychologists Each chapter also includes a list of suggested readings Toward a Global Psychology is ideal for both researchers and students interested in a global psychology and for advanced courses on international or cross cultural psychology The book's appendix features a sample syllabus for a course on global psychology      **Indigenous Intergenerational Resilience** Lewis Williams, 2021-11-04 This book argues that there is a need to develop greater indigenous led intergenerational resilience in order to meet the challenges posed by contemporary crises of climate change cultural clashes and adversity In today's media the climate crisis is kept largely separate and distinct from the violent cultural clashes unfolding on the grounds of religion and migration but each is similarly symptomatic of the erasure of the human connection to place and the accompanying tensions between generations and cultures This book argues that both forms of crisis are intimately related under scored and driven by the structures of white supremacy which at their most immediate and visible manifest as the discipline of black bodies and at more fundamental and far reaching proportions are about the power privilege and patterns of thinking associated with but no longer exclusive to white people In the face of such crisis it is essential to bring the experience and wisdom of Elders and traditional knowledge keepers together with the contemporary realities and vision of youth This book's inclusive and critical perspective on Indigenous led intergenerational resilience will be valuable to Indigenous and non Indigenous interdisciplinary scholars working on human ecological resilience      **Rebuilding the Profession** Dorothy Figueira, 2020-01-20 This volume is meant to be a retrospective look at the field of Comparative Literature as it has developed in the past two decades as well as a reflection on its future direction if it is to remain relevant and innovative as a

field of study From its inception in the second half of the twentieth century Comparative Literature in the US has been conceived as a cross disciplinary cross national and crosscultural enterprise that brings together theoretical developments in the Humanities and Social Sciences to reflect on the most important intellectual and cultural trends from a comparative perspective through the lens of literary studies Most of the founders of Comparative Literature were distinguished European scholars who sought a safe haven from the ravages of World War II and its aftermath and who understandably focused on the Western literary intellectual and cultural tradition which at the time was in danger of being annihilated by the onslaught of Fascism and Communism With the advent of the age of globalization the field of Comparative Literature has become increasingly diverse and must therefore be reoriented and recognized accordingly
