Development and Human Security Robert Picciotto, Michael Clarke, Funmi Olonisakin, King's College London. International Policy Institute, Lawrence Freedman, Sverige Utrikesdepartementet. Williams, 2012-03-06 Security and development matter they often

involve issues of life and death and they determine the allocation of truly staggering amounts of the world's resources. Particularly since the start of the wars in Afghanistan and Iraq there has been momentum in policy circles to merge the issues of security and development to attempt to end conflicts, create durable peace, strengthen failing states and promote the conditions necessary for people to lead healthier and more prosperous lives. In many ways this blending of security and development agendas seems admirable and designed to produce positive outcomes all around. However, it is often the case that the two concepts in combination do not receive equal weight, with security issues getting priority over development concerns. This is not desirable and actually undermines security in the longer term. Moreover, there are major challenges in practice when security practitioners and development practitioners are asked to agree on priorities and work together. **Security and Development in Global Politics** illuminates the common points of interest but also the significant differences between security and development agendas and approaches to problem solving. With insightful chapter pairings, each written by a development expert and a security analyst, the book explores seven core international issues: aid, humanitarian assistance, governance, health, poverty, trade, and resources and demography. Using this comparative structure, the book effectively assesses the extent to which there really is a nexus between security and development and, most importantly, whether the link should be encouraged or resisted.

Global Governance, Development and Human Security Caroline Thomas, 2000. This work provides an overall statement about the subject of human security in a global economy. It is organized to achieve two main aims: to embed the idea of human security in the framework of the evolving global economy and to illustrate the challenges and opportunities to human security as we enter the 21st century by empirical studies. **Globalization and Security** G. Honor Fagan, 2009. Broad in scope, this two-volume set covers the economic and political aspects of globalization as well as its social and cultural impacts. **Human Security in a Polarized World** Prof. Dr. Aurora Martin, Dr. Nandini Basistha, 2024-11-14. The term polarization describes the widening gaps in national economies, sociocultural views, and political beliefs. Ideological differences in politics can be a sign of it, resulting in impasse and a decline in confidence in democratic institutions. In terms of the economy, globalization exacerbates disparities between rich and poor regions, while polarization exacerbates wealth gaps and opportunity disparities. Social polarization breeds mistrust and intolerance, leading to identity-based disputes and further splintering society. Although globalization encourages integration and connectivity, it has also heightened polarizing tendencies. It exacerbates international instability, fuels trade disputes, and expands the wealth gap between the rich and the poor. Traditions and values are eroding as a result of cultural globalization. In this respect, globalization must be used to promote inclusivity, tolerance, and cross-national cooperation in order to combat polarization.
