Global Inequality Branko Milanovic, 2016-04-11 Winner of the Bruno Kreisky Prize Karl Renner Institut A Financial Times Best Economics Book of the Year An Economist Best Book of the Year A Livemint Best Book of the Year One of the world's leading economists of inequality Branko Milanovic presents a bold new account of the dynamics that drive inequality on a global scale Drawing on vast data sets and cutting edge research he explains the benign and malign forces that make inequality rise and fall within and among nations He also reveals who has been helped the most by globalization who has been held back and what policies might tilt the balance toward economic justice The data Milanovic provides offer a clearer picture of great economic puzzles and his bold theorizing chips away at tired economic orthodoxies The Economist Milanovic has written an outstanding book Informative wide ranging scholarly imaginative and commendably brief As you would expect from one of the world's leading experts on this topic Milanovic has added significantly to important recent works by Thomas Piketty Anthony Atkinson and Francois Bourguignon Ever rising inequality looks a highly unlikely combination with any genuine democracy It is to the credit of Milanovic's book that it brings out these dangers so clearly along with the important global successes of the past few decades Martin Wolf Financial Times

Global Inequality Branko Milanović, 2018 One of the world's leading economists of inequality Branko Milanovic presents a bold new account of the dynamics that drive inequality on a global scale Drawing on vast data sets and cutting edge research he explains the benign and malign forces that make inequality rise and fall within and among nations He also reveals who has been helped the most by globalization who has been held back and what policies might tilt the balance toward economic justice Global Inequality takes us back hundreds of years and as far around the world as data allow to show that inequality moves in cycles fueled by war and disease technological disruption access to education and redistribution The recent surge of inequality in the West has been driven by the revolution in technology just as the Industrial Revolution drove inequality 150 years ago But even as inequality has soared within nations it has fallen dramatically among nations as middle class incomes in China and India have drawn closer to the stagnating incomes of the middle classes in the developed world A more open migration policy would reduce global inequality even further Both American and Chinese inequality seem well entrenched and self reproducing though it is difficult to predict if current trends will be derailed by emerging plutocracy populism or war For those who want to understand how we got where we are where we may be heading and what policies might help reverse that course Milanovic's compelling explanation is the ideal place to start Provided by publisher

The Return of History

Jennifer Welsh,2016-09-17 In the 2016 CBC Massey Lectures former Special Advisor to the UN Secretary General and international relations specialist Jennifer Welsh delivers a timely intelligent and fascinating analysis of twenty first century geopolitics In 1989 as the Berlin Wall crumbled and the Cold War dissipated the American political commentator Francis Fukuyama wrote a famous essay entitled The End of History which argued that the demise of confrontation between Communism and capitalism and the expansion of Western liberal democracy signalled the endpoint of humanity s sociocultural and political evolution and the path toward a more peaceful world But a quarter of a century after Fukuyama s bold prediction history has returned arbitrary executions attempts to annihilate ethnic and religious minorities the starvation of besieged populations invasion and annexation of territory and the mass movement of refugees and displaced persons It has also witnessed cracks and cleavages within Western liberal democracies as a result of deepening economic inequality The Return of History argues that our own liberal democratic society was not inevitable but that we must all as individual citizens take a more active role in its preservation and growth

Outgrowing Capitalism

Marco Dondi,2021-11-16 It s time to rethink how we create and allocate money In Outgrowing Capitalism Marco Dondi sheds light on the fact that most people do not have the economic security to focus on purpose and life fulfillment He proposes that this is not the way things have to be there is an alternative In a quest to change our economic system to cater for everyone he identifies deep issues in how money is created and allocated and connects these to capitalism He shows that the assumptions and circumstances that made capitalism a success are no longer true today and then describes a new socio economic model Monetism Dondi s solution is to provide a pragmatic roadmap to institutionalize Monetism and solve societal issues that seemed as permanent as time

Age of Iron

Colin Dueck,2020 In his latest book Age of Iron Colin Dueck explores the past present and future of Republican foreign policy nationalism He argues that American conservatives and Republican presidents from Theodore Roosevelt onward have always struck balances between nationalist and internationalist impulses Dueck offers an assessment of the Trump administration s foreign policy including analysis of populist conservative political trends Finally he offers recommendations for current US national security policy based upon the recognition that the post Cold War Wilsonian moment is over

Re-globalisation

Dong Wang,Dejun Cao,2020-12-29 Since the end of the Cold War globalisation has been the dominant political and economic trend But what is China s role in globalisation What is China s vision of the world This

title offers a fresh and stimulating account of how China's involvement in globalisation has changed over time and how its role in leading the re-globalisation process is profoundly reshaping the world. Introducing an innovative theoretical framework in the shape of re-globalisation, this book discusses China's strategies and challenges while interacting with the international community. The book provides several illuminating case studies such as the Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB), and the strategies of the Chinese technology firm Alibaba. Rich in data and bold in argument, the book provides an extraordinarily dynamic depiction of how China's encounter with the outside world has not only transformed itself but also reshaped the global order. As the first systemic and book-length study of re-globalisation, this volume will appeal to researchers and students of politics and Chinese studies and contemporary Chinese politics in particular.

National Market Liberalism: The Facts, the Fears, the Fight Branko Milanovic, 2025-11-06

Global neoliberalism is on its last legs as a new international economic order takes hold: trade blocs, tariff wars, economic sanctions, and national champions are in vogue; nationalism, anti-immigration movements, and the far right are on the rise. Liberalism is being rejected by the civic realm as the status quo of the past fifty years crumbles. What remains in its wake? Drawing on original research, leading economist Branko Milanovic reveals the seismic shifts that are shaping our world. He details the facts: how the rising economic power of Asia is creating a new global middle class in the greatest reshuffle of incomes since the Industrial Revolution. He explores our fears: why are we becoming increasingly unhappy when the world is becoming richer and more equal? And he shows us the fight ahead: as plutocracy returns, global war threatens, and a new system silently shapes our nations, driving discontent to breaking point.

In *National Market Liberalism*, Milanovic provides an invaluable guide to the new 21st century.

[What Next for Sustainable Development?](#) James Meadowcroft, David Banister, Erling Holden, Oluf Langhelle, Kristin Linnerud, Geoffrey Gilpin, 2019

This book examines the international experience with sustainable development since the concept was brought to world-wide attention in *Our Common Future*, the 1987 report of the World Commission on Environment and Development. Scholars from a variety of disciplinary backgrounds engage with three critical themes: negotiating environmental limits, equity, environment and development, and transitions and transformations. In light of the 2030 Sustainable Development Goals recently adopted by the United Nations General Assembly, they ask what lies ahead for sustainable development.

The Great Leveler Walter Scheidel, 2018-09-18

Are mass violence and catastrophes the only forces that can seriously decrease economic inequality? To judge by thousands of years of history, the answer is yes. Tracing the global history of inequality from the Stone Age to today, Walter Scheidel shows that inequality never dies peacefully. Inequality declines when carnage and disaster strike and increases when peace and stability return. *The Great Leveler* is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world. Ever since humans began to farm, herd, livestock, and pass on their assets to future

generations economic inequality has been a defining feature of civilization Over thousands of years only violent events have significantly lessened inequality The Four Horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich Scheidel identifies and examines these processes from the crises of the earliest civilizations to the cataclysmic world wars and communist revolutions of the twentieth century Today the violence that reduced inequality in the past seems to have diminished and that is a good thing But it casts serious doubt on the prospects for a more equal future An essential contribution to the debate about inequality The Great Leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon **International Affairs** ,2002 *Compassion* Maureen H. O'Connell,2009 After presenting a historical overview of the development of the concept of compassion O Connell turns to contemporary theologians Jon Sobrino and Johann Baptist Metz to better understand how compassion can alleviate massive and unjust suffering and how compassion offers a road map for a better future *International Journal of Contemporary Sociology* ,2005 The Haves and the Have-Nots Branko Milanovic,2010-12-28 Who is the richest person in the world ever Does where you were born affect how much money you ll earn over a lifetime How would we know Why beyond the idle curiosity do these questions even matter In The Haves and the Have Nots Branko Milanovic one of the world s leading experts on wealth poverty and the gap that separates them explains these and other mysteries of how wealth is unevenly spread throughout our world now and through time Milanovic uses history literature and stories straight out of today s newspapers to discuss one of the major divisions in our social lives between the haves and the have nots He reveals just how rich Elizabeth Bennet s suitor Mr Darcy really was how much Anna Karenina gained by falling in love how wealthy ancient Romans compare to today s super rich where in Kenya income distribution was Obama s grandfather how we should think about Marxism in a modern world and how location where one is born determines his wealth He goes beyond mere entertainment to explain why inequality matters how it damages our economics prospects and how it can threaten the foundations of the social order that we take for granted Bold engaging and illuminating The Haves and the Have Nots teaches us not only how to think about inequality but why we should The Third World in the Global Governance System Martin Hvidt,Morten Ougaard,2003
