## **Globalization And Human Rights:**

**Civilising Globalisation** David Kinley, 2009-08-13 Economic globalisation and universal human rights both have the aspiration and power to improve and enrich individuals and communities. However, their respective institutions, methods, practices and goals differ, leading to both detrimental clashes and beneficial synergies. In this book, David Kinley analyses how human rights intersect with the trade and commercial dimensions of global economic relations, taking the view that while the global economy is a vitally important civilising instrument, it itself requires civilising according to human rights standards. Combining meticulous research with highly informed views and experiences, he outlines the intellectual policy and practical frameworks for ensuring that the global economy advances the ends of human rights, argues for better exploitation of the global economy's capacity to distribute as well as create wealth, and proposes mechanisms by which to minimise and manage the socially debilitating effects of its market failures and financial meltdowns.

**Globalization and Human Rights** Jesús Ballesteros, Encarnación Fernández Ruiz-Gálvez, Pedro Talavera, 2012-04-14 Globalisation turns out to be untenable because it does not guarantee minimum social equity, peace and respect for the environment, and therefore does not guarantee the effective accomplishment of human rights. This book analyzes this issue and raises proposals for a new perspective. The first part describes the soft threats to human rights derived from the devaluation of the politics and the productive economy with regard to the finance. It entails the concealment of the reality in the shape of exploitation as the tax havens and in the shape of marginalization of the persons with different abilities. The second part includes a study of hard threats to human rights and examines two cases of failed states, Afghanistan and Somalia, in which the violence has supplanted the politics and the economy. In view of these situations, it is necessary to rethink the force of classic *ius gentium* and the humanitarian right. The third part presents the European Union as a legal and political space in which conditions of a worthy life are better defended by means of the Primacy of Practical Reason and Social State of Law, and by the requirement of peace as the main rule of international relations.

*The Globalization of Human Rights* Jean-Marc Coicaud, Michael W. Doyle, Anne-Marie Gardner, 2003 International efforts to construct a set of standardised human rights guidelines are based upon the identification of agreed key values regarding the relationships between individuals and the institutions governing them, which are viewed as critical to the well-being of humanity and the character of being human. This publication considers these issues of justice at the national, regional and international levels by analysing civil, political, economic and social rights aspects.

*Economic Globalisation and Human Rights* Wolfgang Benedek, Koen Feyter, Fabrizio Marrella, 2007 Economic globalisation is one of the guiding paradigms of the twenty-first century. The challenge it implies for human rights is fundamental, and key questions have up to now received no satisfying answers. How should human rights evolve in response to a global economy in which non-statal actors are decisive forces? *Economic Globalisation and Human Rights* sets out to assess
