Flows Networks Princeton Legacy Library:

Flows in Networks Lester Randolph Ford Jr., D. R. Fulkerson, 2024-12-03 A landmark work that belongs on the bookshelf of every researcher working with networks In this classic book first published in 1962 L R Ford Jr and D R Fulkerson set the foundation for the study of network flow problems The models and algorithms introduced in *Flows in Networks* are used widely today in the fields of transportation systems manufacturing inventory planning image processing and Internet traffic The techniques presented by Ford and Fulkerson spurred the development of powerful computational tools for solving and analyzing network flow models and also furthered the understanding of linear programming In addition the book helped illuminate and unify results in combinatorial mathematics while emphasizing proofs based on computationally efficient construction With an incisive foreword by Robert Bland and James Orlin *Flows in Networks* is rich with insights that remain relevant to current research in engineering management and other sciences

Agricultural Innovation for Societal Change Bo M. I. Bengtsson, 2024-12-20 Over the centuries agriculture has developed through technological steps illustrated by various agricultural revolutions This book describes and analyses significant agricultural changes since the mid 1960s in the context of development innovation and adoption by revisiting resource poor farmers in Ethiopia Sweden and Trinidad and Tobago and considering overall development changes up to the early 2020s It is a platform for discussing current issues for future global food security in the context of globalization and free global trade which have influenced economic growth in many countries but also created environmental concerns and a rapid increase in the number of transnational corporations TNCs Sustainable food production is now a global priority and therefore ecological footprints must be reduced this book provides examples of possible technical changes required to achieve this Reducing greenhouse gas emissions alone is insufficient political attention must be paid to declining biodiversity the increasing global exploration of natural resources demography increased consumption waste mountains expanding migration and antibiotic resistance Agribusiness TNCs will challenge national governments and international donors in both research and development increasing competition for leadership A gradual societal change incorporating an understanding of biological fundamentals is necessary for achieving sustainability and for leading us towards the next agricultural revolution

Europe and the Everyday Elena Glockzin, Stephan Stetter, 2024-12-30 Due to significant processes of transnationalization in the European context a considerable relevance of potential social and political conflicts or disagreements in everyday life linked to Europe or the European Union can be observed Consequently the focus of this book is on the increasingly intertwined European citizens themselves and their everyday experiences with European and EU related issues The individual chapters provide fine tuned perspectives on the connection of social and political European integration processes in the context of the EU and the everyday life of Europeans Overall the book draws attention to both how contestations over Europe and the EU figure in everyday life and on how European integration shapes individual social and political subjectivities and identities This book is

intended for scholars and advanced students of European Studies Sociology and Political Science and International Relations
