Entity-Oriented Search Krisztian Balog, 2018-10-02 This open access book covers all facets of entity oriented search where search can be interpreted in the broadest sense of information access from a unified point of view and provides a coherent and comprehensive overview of the state of the art It represents the first synthesis of research in this broad and rapidly developing area Selected topics are discussed in depth the goal being to establish fundamental techniques and methods as a basis for future research and development Additional topics are treated at a survey level only containing numerous pointers to the relevant literature A roadmap for future research based on open issues and challenges identified along the way rounds out the book The book is divided into three main parts sandwiched between introductory and concluding chapters The first two chapters introduce readers to the basic concepts provide an overview of entity oriented search tasks and present the various types and sources of data that will be used throughout the book Part I deals with the core task of entity ranking given a textual query possibly enriched with additional elements or structural hints return a ranked list of entities This core task is examined in a number of different variants using both structured and unstructured data collections and numerous query formulations In turn Part II is devoted to the role of entities in bridging unstructured and structured data Part III explores how entities can enable search engines to understand the concepts meaning and intent behind the query that the user enters into the search box and how they can provide rich and focused responses as opposed to merely a list of documents a process known as semantic search The final chapter concludes the book by discussing the limitations of current approaches and suggesting directions for future research Researchers and graduate students are the primary target audience of this book A general background in information retrieval is sufficient to follow the material including an understanding of basic probability and statistics concepts as well as a basic knowledge of machine learning concepts and supervised learning algorithms

Document Analysis And Text Recognition: Benchmarking

State-of-the-art Systems Volker Margner, Umapada Pal, Apostolos Antonacopoulos, 2018-02-27 The compendium presents the latest results of the most prominent competitions held in the field of Document Analysis and Text Recognition It includes a description of the participating systems and the underlying methods on one hand and the datasets used together with evaluation metrics on the other hand This volume also demonstrates with examples how to organize a competition and how to make it successful It will be an indispensable handbook to the document image analysis community

Proceedings of the Topical Meeting on Methods of Seismic Hazards Evaluation, Focus '95 American Nuclear Society,1996 Evaluation of Text Summaries Based on Linear Optimization of Content Metrics Jonathan Rojas-Simon,Yulia Ledeneva,Rene Arnulfo Garcia-Hernandez,2022-08-18 This book provides a comprehensive discussion and new insights about linear optimization of content metrics to improve the automatic Evaluation of Text Summaries ETS The reader is first

introduced to the background and fundamentals of the ETS. Afterward, state-of-the-art evaluation methods that require or do not require human references are described. Based on how linear optimization has improved other natural language processing tasks, we developed a new methodology based on genetic algorithms that optimize content metrics linearly. Under this optimization, we propose SECO SEVA as an automatic evaluation metric available for research purposes. Finally, the text finishes with a consideration of directions in which automatic evaluation could be improved in the future. The information provided in this book is self-contained. Therefore, the reader does not require an exhaustive background in this area. Moreover, we consider this book the first one that deals with the ETS in depth.
